New Name Announced for Local Environmental Firm

Resource Laboratories, LLC and Absolute Air Quality are now Absolute Resource Associates

PORTSMOUTH, NH, January, 2011- Resource Laboratories, LLC and Absolute Air Quality of Portsmouth, NH will now be known as Absolute Resource Associates, the company announced today. Absolute Resource Associates is a locally owned, nationally certified environmental services company which provides a wide array of analytical testing, indoor air quality and environmental project management services to clients throughout New England.

“We are combining the best of Resource Labs and Absolute Air Quality, with a renewed focus on the needs of our clients in an ever-changing industry,” said co-owner Guy Sylvester. “Absolute Resource Associates will still do the same things (as RL and AAQ), while expanding our services, increasing our efficiency and keeping an eye on the future.”

Resource Laboratories, LLC and Absolute Air Quality have enjoyed steady growth in an otherwise dismal economy, and Sylvester attributes their success to a variety of factors. “Stricter government regulations, a “greener” business climate, and public awareness of environmental issues have certainly contributed to our growth,” Sylvester said. “Combine those things with our commitment to our customers and our passion for the environment, and it has been a recipe for success.” Absolute Resource Associates will remain at the same location on Heritage Ave. in Portsmouth, and the only expected staff changes would be to add new hires to accommodate any future growth.

Resource Laboratories, LLC was founded in 1993, and was purchased by environmental specialists Susan and Guy Sylvester in 2000. In 2005 the Sylvesters created Absolute Air Quality, a separate division which specialized in Indoor Air Quality. Absolute Resource Associates will combine the RL and AAQ brands under one umbrella, providing environmental services related to water, soil, and indoor air quality, as well as mold, lead, asbestos and other environmental contaminants. Their clients range from homeowners and businesses, to municipalities, and federal agencies. Absolute Resource Associates is a small woman owned business, a small disadvantaged business (DBE) and an SBA 8(a) program participant.
