

Curriculum Vitae

Jason Muchmore, Manager of Indoor Air Quality Services

Jason Muchmore is the Manager of Indoor Air Quality (IAQ) Services at Absolute Resource Associates (ARA) in Portsmouth, NH. An experienced professional with demonstrated skill and expertise in management and environmental consulting, Jason currently oversees all IAQ operations at ARA, including managing personnel and projects, performing IAQ assessments, collecting samples, providing recommendations for eliminating problems related to indoor pollutants and air quality, providing detailed reports, and outlining investigative findings associated with all aspects of the indoor environment.

Jason has a long and growing list of licenses and certifications to perform authoritative mold, lead paint and asbestos investigations in New Hampshire and several surrounding states. He is an ACAC Council-certified Indoor Environmentalist (CIE), a Certified Lead Inspector, as well as a Licensed Asbestos Inspector and Asbestos Monitor. A true specialist, he has vast experience performing investigations in residential, commercial and Federal buildings for Sick Building Syndrome, Building Related Illness, asbestos, lead and microbial contaminants such as mold and bacteria. The IAQ Division has shown impressive growth in recent years, and his group has earned much peer respect and commendation under Jason's guidance.

Jason has served as Site Superintendent and SSHO (Site Safety and Health Officer) for various Federal projects, and is an experienced Federal and Commercial Project Manager with excellent interpersonal, analytical, and organizational skills. Jason excels at communicating with others at all levels to ensure project goals are attained correctly and safely. His field experience includes projects related to lead, mold, and asbestos contamination for the Army Corps of Engineers, Portsmouth Naval Shipyard, US Coast Guard, US Army at West Point, and Hanscom Air Force Base. Jason also provides expert testimony in court cases related to mold, asbestos and other indoor contaminants. His scientific background and expert opinions are valued by both prosecutors and defense attorneys when trying such cases.
